

## NON-WOVEN BLADES

Beveled and serrated knives that truly are a cut above the rest.

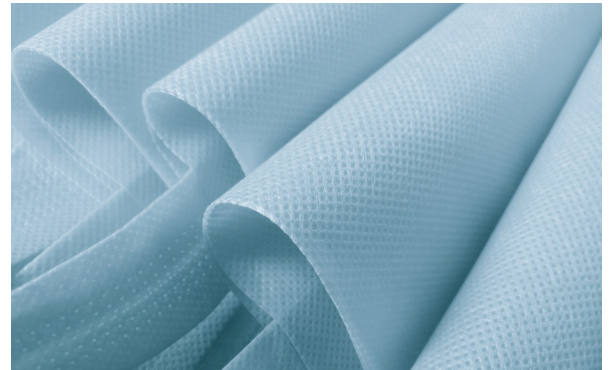

Leverwood manufactures a range of cutting solutions tailored for the non-woven materials sector. Our non-woven blades find applications in diverse fields, from healthcare and personal care to automotive and construction, proving essential in:

- Personal care items such as diapers and wipes for comfort and hygiene
- Medical products like surgical gowns and masks for health and safety
- Filtering systems for air and water purification
- Geotextiles for soil stabilization and erosion control in civil engineering

### BLADES FOR EVERY NEED

- **Sheeter Knives:** Ideal for high-speed, efficient cuts across various dimensions
- **Cross-Cut and Cut-Off Knives:** Engineered for precise, clean severing of products
- **Serrated Knives:** Perfect for detailed cutting requirements with impeccable accuracy
- **Perforating Knives:** Designed to create easy-tear lines, enhancing product usability

### THE LEVERWOOD ADVANTAGE

We are not just about blades; we are about creating value and delivering performance that drives your business forward. Our engineering support and in-depth knowledge of the industrial knife landscape sets us apart, ensuring that every blade we craft meets rigorous standards of quality and efficiency.

For blades that cut cleaner, last longer, and perform better, trust Leverwood Knife Works.
